

What do we all fear the most?

It terrifies us!

The dreaded toilet door handle!

Your standard toilet door handles are one of the fastest ways for infections and viruses to spread. No real surprise given that the typical handle in a public toilet is home to up to 40,000 germs per square inch.

Standard handles are without doubt the largest carrier of healthcare associated infections!

Door Handles are one of the largest touch points within the public environment, traditional stainless steel or painted handles increase the spread of infections by providing an area for transmission to occur, creating more carriers. Handles in particular are used many times by numerous users between normal cleaning, this allows bacteria to transfer, multiply and then spread to other users.

FACT!
67% of Women use a paper towel to open a toilet door

FACT!
59% of Men use their sleeve to open a toilet door

FACT!
Some men even admitted to this

- 99.9% of people young & old find touching a toilet door handle terrifying
- 30% of people don't wash their hands after visiting your toilets
- 66% of people do not use soap in your toilets

Steri-Core™

SteriCore - are pleased to introduce the World's first antibacterial 'to the core' door handles

Patents granted

You can now protect your customers, staff and children from harmful bacteria

Clinically proven to kill 99.9% of all known human harmful bacteria including:

- Norovirus
- MRSA
- E.Coli
- C.Difficile
- Salmonella
- Fungal
- Legionella

Test certificates available on request

Our handles are manufactured from a one piece, unique, non-porous, ultrastrong durable nylon. Our antimicrobial silver additive runs through the handles to their core. This is clinically certified to kill 99.9% of all known human bacteria on contact and prevents any bacteria from growing on their surface, even if our product becomes scratched or damaged in any way, it still retains its antimicrobial properties - guaranteeing a safe environment

Steri-Core™

Why you must install our Antimicrobial Handles:

Restaurants / Pubs

- ✓ Peace of mind for your customers
- ✓ Prevents unnecessary staff sick days
- ✓ Visible identification that your establishment has antibacterial handles installed
- ✓ Shows that you care about hygiene
- ✓ Helps maintain your Food Hygiene Rating

Schools

- ✓ 80% of school infections are spread by touch
- ✓ 99% of school children do not clean their hands sufficiently to remove harmful bacteria
- ✓ Prevents unnecessary pupil and staff sick days
- ✓ Helps achieve DFE absent targets
- ✓ Up to 6 school days are lost per pupil annually due to sickness and diarrhoea

Workplace & Healthcare Environments

- ✓ Reduce employee sickness
- ✓ Government figures show businesses lose £600 per employee per year through infection
- ✓ 30% of the public do not wash their hands after going to the toilet
- ✓ 64% of the public who do wash their hands do not use soap

Other Key Benefits

- ✓ Antimicrobial for the life of the product
- ✓ Scratch and water resistant
- ✓ Our unique material will not rust unlike standard metal handles
- ✓ UV & fade resistant
- ✓ Looks great and easy to clean

Invention - innovation through science

Our Antimicrobial handles can also be used for:

- All Office Doors
- Internal Fire Doors
- School & Hospital Corridors
- Classrooms Doors
- All Swing Doors

All standard metal handles are without doubt the largest carrier of healthcare associated infections

We don't just live on toilet door handles

100% of standard door handles harbour dangerous bacteria
